1 Executive Summary

Dudek conducted a Phase I Environmental Site Assessment (ESA) for the area located in the northwestern portion of the San Diego State University (SDSU) campus, on the northern end of 55th Street in San Diego, California 92115 (subject property); see Figure 1, Subject Property Location. The subject property consists of various structures, including primarily multi-family housing, located on approximately 10.3 acres of land. SDSU proposes to demolish the existing structures and construct new student housing and related support facilities.

Phase I ESAs assist in identifying past and present land use, including identification of possible releases or disposal of manufacturing or other wastes if such information is contained within regulatory reports or files and/or is currently visible on site. The assessment reviews federal (U.S. Environmental Protection Agency), state, county, and local lists of known or potentially hazardous waste sites, landfills, and sites currently under investigation for environmental violations that may be of concern to a site.

Dudek performed this Phase I ESA of the subject property in conformance with the scope and limitations of ASTM E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM 2021). This report summarizes the research and findings of the Phase I ESA.

The findings of this investigation are based on historical sources, information contained in regulatory agency databases, interviews, and a site reconnaissance.

Information gathered for this report indicated the following:

- The subject property was undeveloped and vacant land prior to development as multi-family housing.
- The subject property consists of multiple one-story and two-story residential housing developments which were constructed between 1953 and 1964.
- The southeastern portion of the subject property includes multiple small structures utilized as SDSU's International Student Center, Global Education Office, and Passport Office. These buildings were constructed between approximately 1994 and 2009. These structures were not accessible during the Site Reconnaissance, which constitutes a data gap. Based on the current and prospective land use, this data gap is not considered significant. Data gaps are discussed in Section 13, Limitations.
- Multiple environmental regulatory database listings relating to the subject and adjoining properties were identified. These listings were generally administrative in nature, and documented waste removal, chemical storage, and permitted activities. As such, the listings do not indicate a likely impact to the environmental conditions of the subject property.
- The subject property is adjoined by vegetation to the north, east, and west. Beyond the adjoining land, residences are present to the west, Interstate 8 to the north, and the SDSU Logistics Services Building to the east. The southern adjoining properties consist of the SDSU campus and associated facilities.

This assessment did not reveal evidence of recognized environmental conditions (RECs), historical RECs, controlled RECs, or vapor encroachment conditions in connection with the subject property. Thus, the assessment did not uncover the presence or likely presence of any hazardous substances or petroleum products in, on, or at the subject property due to a release, likely release, past release, or material threat of a future release to the

DRAFT

environment. Based on the analysis, the following environmental condition of potential concern was identified for the subject property:

- Due to the age of construction of the subject property structures, lead-based paint and asbestos may be of concern for the subject property for future demolition or renovations.

2 Introduction

This Phase I ESA was performed according to the guidelines stipulated in ASTM E1527-21 (ASTM 2021). This Phase I ESA was conducted as part of environmental due diligence for redevelopment of the subject property.

2.1 Assessment Procedure and Scope of Investigation

Phase I ESAs assist in identifying past and present land use, including identification of possible releases or disposal of manufacturing or other wastes if such information is contained within regulatory reports or files and/or is currently visible on site. The assessment reviews federal (U.S. Environmental Protection Agency), state, county, and local lists of known or potentially hazardous waste sites, landfills, and sites currently under investigation for environmental violations that may be of concern to a site.

The scope of this environmental investigation consisted of (1) a reconnaissance of the subject property; (2) a search of regulatory agency records; (3) a review of available historical aerial photographs, topographic maps, Sanborn fire insurance maps, city directory listings, and building department records; (4) an evaluation of the potential for vapor intrusion risk; (5) interviews with the owner of the subject property and user of this report; and (6) preparation of this Phase I ESA report detailing the findings of the investigation.

These activities were conducted to identify RECs. The term *recognized environmental condition* (REC) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at the subject property due to a release, likely release, past release, or material threat of a future release to the environment.

The term *controlled recognized environmental condition* is an environmental condition that would have been considered a REC in the past but that has been remediated and received risk-based closure by a regulatory agency (i.e., received a "no further action" letter) where residual contamination remains in place. Furthermore, the term *controlled REC* is used if the property is subject to a control or use restriction (i.e., property use restrictions, activity and use limitations, institutional controls, or engineering controls) due to residual on-site contamination.

The term *historical recognized environmental condition* is an environmental condition that would have been considered a REC in the past but that has been remediated and received unrestricted residential use closure by the regulatory agency. Therefore, no controls or use restrictions have been applied to the property.

The term *REC* is not intended to include de minimis conditions. De minimis conditions are conditions that generally do not present a material risk of harm to public health or the environment and thus would not be subject to an enforcement action if brought to the attention of governmental agencies.

2.2 Qualifications of Environmental Professionals

This Phase I ESA was prepared by Audrey Herschberger, environmental engineer, and Stephanie Chao, environmental engineer. Qualifications for Ms. Herschberger and Ms. Chao are included in Appendix A. The following statement is made by the environmental professional, Audrey Herschberger:

DRAFT

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in Section 312.10 of Title 40 of the Code of Federal Regulations, Part 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in Title 40 of the Code of Federal Regulations, Part 312.

DRAFT

3 Site Location

The subject property consists of multiple parcels of land comprising approximately 10.3 acres located in the City of San Diego (City), San Diego County, California; see Figure 1, Subject Property Location. The subject property is located just south of Interstate (I) 8 and the San Diego MTS trolley line that parallels I-8 before it extends southward into the San Diego State University (SDSU) campus.

The subject property is located in the northwestern region of the SDSU campus and currently consists of student housing buildings and the SDSU International Affairs Complex consisting of a faculty international engagement office, global education office, international student center, and passport office; see Figure 2, Subject Property Features.

The subject property is adjoined by canyonland vegetation to the north, east, and west. Beyond the adjoining canyonland, residences are present to the west, I-8 to the north, and the SDSU campus to the east. The southern adjoining properties consist of the SDSU campus and associated facilities.

4 Environmental Setting

4.1 Topography and Geology

The subject property is located within the College Area district of the City, on the south side of U.S. I-8, and within the northeastern portion of the SDSU campus. General topographic information for the subject property and the surrounding area was obtained from a review of topographic maps (Appendix B), the Environmental Data Resources (EDR) Radius Map Report (Appendix C), and a site visit. The subject property is on the southern side of Alvarado Canyon, which was formed by the Alvarado Creek and is now developed as I-8. The canyon is lined along the north and south sides by a series of small plateaus. The subject property sits on a small plateau at an average elevation of 411 feet above mean sea level on the south side of Alvarado Canyon. The plateau has a natural downward gradient toward the north. The land adjoining to the north, west, and east of the subject property slopes downward off the plateau to the lower lying areas.

No subsurface geologic investigations were performed as part of this Phase I ESA. According to the EDR Radius Map Report (Appendix C), the subject property is underlain by the Olivenhain cobbly loam soil components. These soils are characterized as clayey soils that are well drained with very slow infiltration rates.

4.2 Groundwater

According to the EDR Radius Map Report, there are no water wells on the subject property and 18 water wells located within 1 mile of the subject property. The nearest groundwater well with depth to water data is located approximately 0.94 miles north-northwest and has a reported water depth of 17.3 feet below ground surface when it was measured in June 2012. Based on a review of the State Water Resources Control Board's Groundwater Ambient Monitoring and Assessment Information System (SWRCB 2024a), there are no water wells located on the subject property, while 37 monitoring wells and 1 water supply well were identified within 1 mile of the subject property. Dudek obtained the groundwater flow direction from a nearby cleanup site located approximately 0.38 miles southeast of the subject property[1]. According to regulatory cleanup closure documents, the shallowest groundwater depth was 47.5 feet below ground surface, with a flow direction to the north (County of San Diego 1998). Due to varied topography in the area and distance from the nearest groundwater data, approximate depth to groundwater at the subject property is unknown.

4.3 Agricultural Use

The subject property is not currently nor has it historically been used for agricultural purposes (see Section 8, Site History).

5 Public Agency Records Search

Table 1 summarizes the environmental databases that were searched as required by ASTM E1527-21, as well as additional environmental databases providing information on hazardous materials and petroleum products on the subject property that were searched ("target property" is the term used by EDR). The comprehensive list of databases is included in the EDR Radius Map Report, which was prepared on August 19, 2024 (Appendix C).

Table 1 lists the databases that were searched, search distances from the subject property, whether the subject property was listed, and the number of sites identified.

5.1 Subject Property

As illustrated in Table 1, 18 listings, each described below, were identified at eight unique addresses for the subject property:

Albert's College Aztec 18, 19, 24. This site is located at 5430 55th Street, on the southwestern portion of the subject property. This site was identified in the Hazardous Waste Tracking System (HWTS) and the Facility and Manifest Data (HAZNET) databases. These databases track reported hazardous waste generation through manifests submitted to regulatory agencies. Reported hazardous materials included asbestos-containing wastes and unspecified oil-containing wastes. No facility violations were noted. These database listings are administrative in nature and do not necessarily indicate a spill or release of hazardous materials to the environment. Based on the information contained in the database, it is unlikely that the environmental conditions of the subject property have been impacted by a spill or release of hazardous materials.

DRAFT

College West Apartments. This site is located at 5445 55th Street, on the eastern portion of the subject property. This site was identified in the HWTS and HAZNET databases. These databases track reported hazardous waste generation through manifests submitted to regulatory agencies. This site is listed for asbestos waste and waste oil removal. No violations were noted. As noted above, these database listings are administrative in nature and do not necessarily indicate a spill or release of hazardous materials to the environment. Based on the information contained in the database, it is unlikely that the environmental conditions of the subject property have been impacted by a spill or release of hazardous materials.

Albert's College/Albert's College Palm Plaza 18. This site is located at 5450 55th Street, on the southwestern portion of the subject property. This site was identified in the HWTS, California Hazardous Material Incident Reporting System (CHMIRS), and HAZNET databases. The CHMIRS database listing identified an incident that occurred in April 2013 where root blockage in a city main line resulted in a sewage release. This incident is indicative of a sewage spill, not a spill or release of hazardous materials to the environment. The HWTS and HAZNET database listings are related to the removal of asbestos-containing wastes, and are administrative in nature. Based on the information contained in the database it is unlikely the environmental conditions of the subject property have been impacted by a spill or release of hazardous materials.

Brian Brewster. This site is located at 5457 55th Street, on the eastern portion of the subject property. This site was identified in the Enforcement and Compliance History Information (ECHO) database for an inactive hazardous waste facility ID number; this listing indicates the site applied for a temporary hazardous waste generation ID number, but no waste generation occurred. The applicant for the temporary ID number was High Standards Abatement (DTSC 2024a). No violations were noted. This database listing is administrative in nature and does not necessarily indicate a spill or release of hazardous materials to the environment. Based on the information contained in the database, it is unlikely the environmental conditions of the subject property have been impacted by a spill or release of hazardous materials.

Aztec Shops Ltd. DBA Alberts College Apartments. This site is located at 5460 55th Street, on the western portion of the subject property. This site was identified in the Facility Index System/Facility Registry System (FINDS), CHMIRS, HWTS, HAZNET, Resource Conservation and Recovery Act – Non-Generators/No Longer Regulated (RCRA NONGEN/NLR), Hazardous Waste Electronic Manifest System (E MANIFEST), and ECHO databases. The CHMIRS database listing identified an incident that occurred in August 2023 where an overhead transformer overloaded, and 2 gallons of mineral oil were released. The release was stopped and contained, so no waterways or storm drains were impacted. Due to the limited nature of the release, it does not indicate an impact to the environmental conditions of the subject property. The FINDS, HWTS, HAZNET, RCRA NONGEN/NLR, E MANIFEST, and ECHO databases are administrative in nature, related to the documented disposal of asbestos-containing wastes. No violations were noted. Based on the information contained in the database, it is unlikely that the environmental conditions of the subject property have been impacted by a spill or release of hazardous materials.

Robert Alego. This site is located at 5484 55th Street, on the northwestern portion of the subject property. This site was identified in the RCRA NONGEN/NLR database, indicating a hazardous waste ID was opened, but no waste generation was reported, and no violations were noted. This database listing is administrative in nature and does not necessarily indicate a spill or release of hazardous materials to the environment. Based on the information contained in the database, it is unlikely that the environmental conditions of the subject property have been impacted by a spill or release of hazardous materials.

DRAFT

MG Properties Group/Albend College Apartments. This site is located at 5485 55th Street, on the northern portion of the subject property. This site was identified in the RCRA NONGEN/NLR, E MANIFEST, ECHO, FINDS, HWTS, and HAZNET databases. These database listings are associated with the generation and removal of asbestos-containing wastes. No violations were noted. They are administrative in nature and do not necessarily indicate a spill or release of hazardous materials to the environment. Based on the information contained in the database, it is unlikely that the environmental conditions of the subject property have been impacted by a spill or release of hazardous materials.

Aztec Shops Ltd. This site is located at 5640 55th Street, on the northern portion of the subject property. This site was identified in the ECHO, HWTS, and HAZNET databases for removal of asbestos-containing wastes. No violations were noted. These database listings are administrative in nature and do not necessarily indicate a spill or release of hazardous materials to the environment. Based on the information contained in the database, it is unlikely that the environmental conditions of the subject property have been impacted by a spill or release of hazardous materials.

5.2 Adjoining Properties

Four listings at two unique addresses were identified adjoining the subject property. These sites are not owned by SDSU, nor are they part of the SDSU campus.

College View Apartments/College View Apartments LLC. This site is located at 5420 55th Street, adjoining to the southwest of the subject property. This site was identified in the RCRA NONGEN/NLR and E MANIFEST databases. Similar to the listings discussed in Section 5.1, these database listings are administrative in nature and do not necessarily indicate a spill or release of hazardous materials to the environment. Based on the information contained in the database, it is unlikely that the environmental conditions of the subject property have been impacted by a spill or release of hazardous materials.

PEP-JSW SDSU Investors, LP/College View Apartments LLC. This site is located at 5420–5422 55th Street, adjoining to the southwest of the subject property. This site was identified in the RCRA NONGEN/NLR and E MANIFEST databases. Similar to the listings discussed in Section 5.1, these database listings are administrative in nature and do not necessarily indicate a spill or release of hazardous materials to the environment. Based on the information contained in the database, it is unlikely that the environmental conditions of the subject property have been impacted by a spill or release of hazardous materials.

5.3 Nearby Properties

A total of 45 listings were identified at 23 unique addresses within the applicable search radii surrounding the subject property.

Of the 45 listings, 29 were listed in the RCRA NONGEN/NLR, E MANIFEST, RCRA-LQG (RCRA Large Quantity Generator), and NOTIFY 65 (Proposition 65 Records) databases. These database listings are administrative in nature and do not necessarily indicate a spill or release of hazardous materials to the environment. Additionally, no facility violations were noted. Therefore, based on the information contained in the database, it is unlikely that the environmental conditions of the subject property have been impacted by a spill or release of hazardous materials.

DRAFT

The remaining 16 listings were identified at 6 unique addresses within the applicable search radii surrounding the subject property, in databases indicative of a spill or release of hazardous materials to the environment (LUST, CPS-SLIC, CA San Diego SAM). Dudek reviewed each of these case files and determined, based on the distance from the subject property, apparent groundwater gradient relative to the subject property, contaminated media (soils only), contaminant of concern (petroleum products), and/or regulatory status (case closed/no further action), that the environmental conditions of the subject property have not been impacted by a spill or release of hazardous materials.

5.4 Unmapped Sites

Unmapped sites are flagged by EDR but not mapped due to insufficient address information. The sites may be included in the database search report because they are in the same zip code as the subject property. The EDR report did not identify any unmapped sites.

DRAFT

6 Interviews

6.1 Site Representative Interview

Dudek sent a site background questionnaire to the user of this report to forward to the owner. A response was received from the owner representative, Kara Peterson, on November 15, 2024. Below is the summary of responses from Ms. Peterson; a copy of the questionnaire is included in Appendix D.

- The current owner has owned the subject property for approximately 15 years.
- The subject property is currently used as student housing (apartments) and parking and has been used as such since approximately the 1950s/1960s (according to information from prior owner).
- Buildings on the subject property consist of 2- and 3- story apartment buildings that were constructed in approximately the 1950s/1960s (according to information from prior owner).
- Past uses of the subject property included housing and parking since the 1950s. Information provided by the prior owner indicated the site was previously undeveloped.
- Previous owners and operators of the site include the following:
    - 55th Street Venture, LLC
    - MW Browar Development Corporation
    - Okavita Family Trust
    - Danube Properties, Inc.
- The subject property and adjoining properties have not been used for industrial or agricultural purposes.
- No known hazardous substance spills or storage have been identified for the subject property.
- There are transformers/capacitors on the subject property that do not contain PCBs.
- Hydraulic equipment is utilized on the subject property as an elevator at the Tarastec building (5445 55th Street). It is unknown whether this equipment contains PCBs.
- An asbestos or lead based paint survey was conducted at the subject property in 2024.
- Pesticides are periodically used at the subject property as part of routine maintenance.
- Geotechnical reports have been conducted for the subject property.
- Ms. Peterson was unaware of any previous hazardous materials use, storage, or other activities on the subject property that could indicate a release of hazardous materials or petroleum products.

6.2 User-Provided Information

In accordance with ASTM E1527-21, to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the tasks outlined in Section 6.2 through 6.8

DRAFT

of ASTM E1527-21 must be completed, including a search for environmental liens and activity and use limitations. To facilitate this requirement, Dudek sent the following questions to San Diego State University. Answers to these questions fulfill the requirement of Sections 6.2 through 6.8 of the ASTM Standard. Kara Peterson, Director of Planning at SDSU, responded on November 15, 2024.

1. **Question:** Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

   Response: No.

2. **Question:** Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

   Response: No.

3. **Question:** As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

   Response: Yes, the property is used as rental student housing. The prior owner used the property as rental housing.

4. **Question:** Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

   Response: Not applicable. Property was purchased in 2009, due diligence was completed.

5. **Question:** Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? (a) Do you know the past uses of the property, (b) do you know of specific chemicals that are present or once were present at the property, (c) do you know of spills or other chemical releases that have taken place at the property, or (d) do you know of any environmental cleanups that have taken place at the property?

   Response: There are no releases/threatened releases. (a) Yes. (b) Custodial supplies only. (c) No. (d) No.

6. **Question:** As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

   Response: No.

6.3 Local Agency Records

6.3.1 City of San Diego

6.3.1.1 Building Department and Development Services

Dudek contacted the City of San Diego's Department of Building and Land Use Enforcement and Development Services on August 27, 2024, to obtain records pertaining to building information and code violations associated

with the subject property. A response was received on September 6, 2024, that referred to the City online search database (Appendix E). Dudek conducted a search of the Accela Citizen Access Online Services on August 27, 2024, to review records pertaining to building records, permits, and code violations. The search returned multiple traffic control permits that were issued between April 2019 and May 2024; two San Diego Gas & Electric utility permits for the period between August 2021 and May 2022; a standard dry utility permit from January 2024 for fiber, telecommunications, gas, or electric work; and a construction–right-of-way permit approved in January 2024 (City of San Diego 2024). No Building and Land Use Enforcement records were identified for the subject property. None of the records indicate any spill or release of hazardous materials to the environment.

6.3.1.2 Fire-Rescue Department

Dudek contacted the City of San Diego's Fire-Rescue Department on August 27, 2024, to obtain records pertaining to hazardous material incident response actions associated with the subject property. As of the date of this report, no response has been received. This lack of response is considered a data gap (see Section 13.1).

6.3.2 County of San Diego

6.3.2.1 Department of Environmental Health and Quality

San Diego Department of Environmental Health and Quality is the Certified Unified Program Agency (CUPA) for the county of San Diego, including the subject property. The CUPA is responsible for implementation of multiple hazardous waste and material standards required by California Health and Safety Code.

Dudek contacted the County of San Diego Department of Environmental Health and Quality's Hazardous Material Division on August 28, 2024, to obtain records pertaining to hazardous materials and chemicals usage and storage, storage tanks, and releases or investigations associated with the subject property. Department of Environmental Health and Quality responded on August 29, 2024, stating that the County does not have any records responsive to the request.

Dudek also reviewed the County of San Diego Department of Environmental Health and Quality's online database (DEHQ 2024) to obtain records and permit information pertaining to the subject property. Multiple records were identified for the various subject property address, including the following (Appendix E):

5430 55th Street: One monitoring well permit application and a monitoring well technical report was identified for the subject property for three geotechnical borings that were done in September 2006 at the 5430, 5460, and 5471 55th Street sites of the subject property.

5450 55th Street: One monitoring well permit application was identified for the subject property for three geotechnical borings that were done in August 2024 at the 55415, 5460, and 5485 55th Street sites of the subject property.

5452 55th Street: One monitoring well permit application for nine geotechnical borings at 5475, 5484, and 5485 55th Street was approved in February 2008, and a monitoring well technical report for four geotechnical borings at the 5430, 5450, 5484, and 5485 55th Street sites was reported in August 2008.

None of the records indicate any spill or release of hazardous materials to the environment; therefore, these records contain no indication of an impact to the environmental conditions of the subject property.

6.3.2.2 Office of the Assessor

Dudek reviewed the Official Records Index by the County of San Diego Office of the Assessor on August 28, 2024, for information pertaining to the subject property (County of San Diego 2024). None of the records contained any indication of an impact to the environmental conditions of the subject property. Records identified consisted of the following:

APN 462-130-06-00: A February 2006 easement identified the Grantor as SCHULZ ROBERT/SCHULZ ROBERT CARL and the Grantee as CITY OF SAN DIEGO.

APN 462-220-07-00 (Lots 110 and 111): A July 2012 deed identified the Grantor as M S BROWAR DEVELOPMENT CORPORATION, OKOVITA FAMILY REVOCABLE TRUST, OKOVITA IRVING, and OKOVITA OLIVIA ESTHER and the Grantee as AZTEC SHOPS LTD. A December 2000 deed identified the Grantor as DANUBE PROPERTIES INC., and the Grantee as BROWAR M S DEVEL. CORP., OKOVITA FAMILY TRUST, OKOVITA IRVING TR., OKOVITA OLIVIA ESTHER TR. A May 1994 quitclaim deed identified the Grantor as WEB SERV. CO. INC. and the Grantee as DANUBE PROPERTIES INC. A February 1993 quitclaim deed identified the Grantor as STRAUSS ANITA L TR./STRAUSS PAUL U TR. and the Grantee as DANUBE PROPERTIES INC.

APN 462-180-08-00 (Lot 112): No results were returned in the Office Records Index.

APN 462-180-09-00 (Lots 113 and 114): No results were returned in the Office Records Index.

APN 462-180-01-00 (Lots 115, 116, and 117): A November 2009 deed identified the Grantor as FIFTY FIFTH STREET VENTURE LLC and the Grantee as AZTEC SHOPS LTD. An October 1987 quitclaim deed identified the Grantor as CLARK STUART T & JANE R and the Grantee as CLARK FAMILY TRUST, CLARK JANE R TR., CLARK STUART T. TR.

APN 462-220-01-00 (Lots 118, 119, 120, and 121): A June 2007 quitclaim deed identified the Grantor as ALBERTS COLLEGE APTS. LLC and the Grantee as FIFTY FIFTH STREET VENTURE LLC.

APN 492-22-03-00 (Lot 122): An October 2013 deed identified the Grantor as Abbot, Charlie H and the Grantee as Abbott, Charlie Henry. A 2007 deed identified the Grantor and Grantee as Zablocki, John T. A 2004 deed identified the Grantor as Knickerbocker, Allan H TR and the Grantee as Zablocki, John T. A 2002 affidavit identified the grantor as Coleman, Clifford William (aka Clifford W EST) and the Grantee as Coleman, Beryl L TR. A 1997 quitclaim deed identified the Grantor as Coleman, Clifford W & Beryl L and the Grantee as Coleman, Clifford W TR.

The southern portion of the subject property that includes the Global Education Office, International Student Center, and Passport Office, are located within the main campus assessor's parcel, which is comprised of 39 separate APNs (County of San Diego 2024).

6.3.2.3 Department of Agriculture, Weights and Measures

Dudek contacted the County of San Diego Department of Agriculture, Weights and Measures on August 28, 2024, to obtain records pertaining to agricultural use associated with the subject property. A response was received on September 4, 2024, that did not identify any records pertaining to the subject property (Appendix E).

6.3.3 California Department of Resources Recycling and Recovery Solid Waste Information System

Dudek reviewed the California Department of Resources Recycling and Recovery Solid Waste Information System online database (CalRecycle 2024). The database has information for all solid waste facilities, operations, and disposal sites in California.

No sites were identified on or within 1 mile of the subject property. The nearest site, Admiral Baker Golf Course, is a closed solid waste disposal site that was identified over 1 mile to the northwest of the subject property. Based on its distance from the subject property, it is unlikely that this site has impacted the environmental conditions of the subject property.

6.3.4 State Water Resources Control Board

Dudek searched GeoTracker, the State Water Resources Control Board's data management system, for sites that impact, or have the potential to impact, water quality in California. GeoTracker records include sites that require cleanup, various unregulated projects, and permitted facilities (SWRCB 2024b). Specific to the subject property, records for 14 sites were identified within 0.5 miles of the subject property. Each of these sites are also identified in the EDR database report, as reviewed and discussed in Section 5, Public Agency Records Search.

6.3.5 Department of Toxic Substances Control

Dudek searched the EnviroStor database management system used for tracking cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known contamination (DTSC 2024b). No sites were identified on the subject property. Two sites were identified within 1 mile of the subject property that were also identified in the EDR database report, as reviewed and discussed in Section 5.

6.3.6 California Environmental Protection Agency Regulated Site Portal

Dudek reviewed the California Environmental Protection Agency Regulated Site Portal, which contains data about environmentally regulated sites and facilities in California (CalEPA 2024). Data sources for the portal include the California Environmental Reporting System, the Department of Toxic Substances Control EnviroStor, the State Water Resources Control Board GeoTracker, the California Integrated Water Quality System, and the Federal Toxics Release Inventory.

California Environmental Protection Agency sites are generally administrative in nature, identifying sites that have environmental permits or that handle hazardous materials or generate hazardous waste but that do not necessarily have an uncontrolled release of hazardous substances to the environment.

No sites were identified on the subject property. A total of 20 site listings were identified within 0.5 miles of the subject property. Of these listings, seven were identified in the EDR report and/or the GeoTracker database and are discussed in Section 5. The remaining 13 site listings were administrative in nature and did not indicate a spill or release of hazardous materials to the environment; therefore, the cases identified in the database do not indicate an impact to the environmental conditions of the subject property.

6.3.7 California Geologic Energy Management Division

Dudek reviewed the California Geologic Energy Management Division database on September 4, 2024 (CalGEM 2024). No oil and gas wells were mapped within 1 mile of the subject property.

6.3.8 National Pipeline Mapping System

Dudek searched the National Pipeline Mapping System online database, which provides a public map viewer application that displays data related to gas transmission and hazardous liquid pipelines, liquefied natural gas plants, and breakout tanks under the Department of Transportation Pipeline and Hazardous Material Safety Administration jurisdiction (NPMS 2024).

No pipelines were identified on the subject property. One gas transmission pipeline was identified approximately 0.4 miles north of the subject property. The active (unfilled)[2] natural gas distribution line is operated by the San Diego Gas & Electric Company. No hazardous liquid pipelines were identified within 1 mile of the subject property. No accidents or incidents were reported within 1 mile of the subject property.

DRAFT

[2] "Unfilled" means the pipeline segment noted is not permanently abandoned in place, but also did not transport a commodity during the reporting year (NPMS 2023).

7 Site Reconnaissance

A site reconnaissance was conducted on August 20, 2024, by Stephanie Chao of Dudek. The site reconnaissance consisted of walking the subject property, taking notes on observations, and taking photographs. Photographs are presented in Appendix F. Ms. Chao was accompanied by Ashley Schultz, Community Manager for SDSU's Office of Housing Administration and Residential Education, during the site reconnaissance.

7.1 Description of Subject Property and Surroundings

The subject property consists of an approximately 10.3-acre irregularly shaped parcel of land. Access to the subject property is from 55th Street to the south (Photograph 1). At the time of the site reconnaissance, the subject property consisted of one three-story and multiple two-story campus residential housing developments (Metepec, Zapotec, Toltec, Mixquic, Zacatepec, Huaxtepec, and Tarastec) (Photographs 2 and 3) and the International Affairs area, which includes the International Student Center, the Passport Office, and the Global Education and Faculty International Engagement buildings (Photograph 4). During the site reconnaissance, access to the buildings within the International Affairs area was discussed with Alyssa Loungeuay (Associate Director, Business & Housing Development for SDSU) and an SDSU staff member at the Global Education Office. Due to the sensitive nature of the business occurring in those buildings, site access was not granted for any of the structures at the time of the site visit. The lack of access constitutes a data gap noted in Section 13. Based on the age of these structures and nature of activities occurring within them, it is unlikely that lead-based paint, asbestos, or other hazardous materials were present within these buildings.

The building layout of the subject property is shown on Figure 2. The housing developments consist of multi-unit residences (Photographs 5–8), an outdoor pool/common area (Photograph 9), electrical rooms (Photographs 10 and 11), and associated parking areas (Photograph 12). The Tarastec housing development is the only building with an elevator (Photograph 13). The subject property has a slight downward slope to the north-northwest.

Overhead power transmission lines were observed on and adjoining the subject property. Multiple pole-mounted transformers were observed on the subject property (Photograph 14). The transformers on the subject property appeared to be in good condition. One Conex box was observed on the subject property, in the parking area between the Huaxtepec and Zacatepec buildings, which housed the hazardous materials storage for the Peninsula Component housing areas (Photographs 15–17). The hazardous materials storage included typical property maintenance items, including pool chemicals, disinfectants/cleaners, household cleaning supplies, and fuel for blowers. Materials were stored in an orderly fashion, no leaks or stains were identified, and flammables cabinets were used.

As observed during the site reconnaissance, the subject property is bordered by the following:

- To the north by vegetation, a trolley line, and the I-8 freeway (Photograph 18)
- To the west by vegetation and residential development (Photograph 19)
- To the east by vegetation, a parking lot and structure, a recreational field, and a warehouse for campus mail and shipments

DRAFT

- To the south by campus housing developments, a parking lot, and the Aztec Recreation Center (Photographs 1 and 20).

The main areas of interest noted during the site reconnaissance are described in the following section.

7.2 Summary of Observations

Potable Water Supply or Source

Potable water supply and evidence of water utilities were observed on the subject property (Photographs 6, 7, and 9).

Sewage Disposal System

Evidence of a public sewer system was observed on the subject property by the presence of showers, toilets, and sinks throughout the subject property. No evidence of septic systems was observed on the subject property.

Wetlands and Natural Waterways

No wetlands or naturally flowing water was observed on the subject property.

Surface Water Discharge

The subject property has a downward gradient toward the north. Surface water at the subject property is expected to flow with the natural gradient toward the north. A storm drain was also observed on the northern end of the subject property (Photograph 21) that would convey nearby surface water.

Distressed Vegetation

No distressed vegetation was observed on the subject property.

Indications of Solid Debris Storage

No solid debris storage or evidence of dumping was observed on the subject property.

Hazardous Material and Petroleum Product Use and Storage

Hazardous materials, chemical, and fuel storage was observed in a Conex box on the subject property (Photographs 15–17). Hydraulic fluid was observed on the subject property for the operation of an elevator. No other hazardous material or petroleum product use was observed on the subject property at the time of the Site Reconnaissance.

Unnaturally Discolored Ponds or Flowing Waters

No unnaturally discolored pools or flowing water were observed on the subject property.

Groundwater Wells, Cisterns, Cesspools, or Septic Tanks

No groundwater wells, cisterns, cesspools, or septic tanks were observed on the subject property.

DRAFT

Polychlorinated Biphenyl-Containing Items

Multiple transformers were observed on the subject property during the site reconnaissance (Photograph 14). An elevator and electrical room with hydraulic fluid was observed on the subject property, associated with the Tarastec housing building (Photographs 13, 22, and 23). The hydraulic oil observed in the elevator room was recently purchased and therefore is not expected to contain PCBs. No other evidence of PCB-containing items was observed during the site reconnaissance.

Sumps or Ponds

No sumps or ponds were observed on the subject property.

Abnormal Odor

No abnormal odors were noted on the subject property.

Surface Staining, Corrosion, and Soil Disturbances

De minimis surface staining was observed during the site reconnaissance on the subject property (Photographs 2 and 21). No corrosion or soil disturbances were observed on the subject property.

Tanks, Drums, Totes, and Intermediate Bulk Containers

No storage tanks, drums, totes, or other bulk containers were observed on the subject property. As noted above, 5-gallon drums of hydraulic fluid were observed in the elevator equipment room, and small quantities of chemicals were observed in the Conex storage box.

Agricultural Use

Based on a review of historical sources (see Section 8), the subject property has not been used for agricultural purposes. During the site reconnaissance, no evidence of agricultural use was observed on the subject property.

Off-Site Sources

There was no evidence of off-site releases or other indications of environmental contamination that have impacted the environmental condition of the subject property.

Fill Material

Fill material was not observed on the subject property.

Unidentified Substance Containers

No unidentified substance containers were observed on the subject property.

Pipelines

No hazardous material pipelines were observed on the subject property.

DRAFT

8 Site History

Based on a review of the historical aerial photographs, historical topographic maps, agency records, and the city directory report, the subject property has been residentially developed since at least 1964 to the present. Prior to development, the subject property was vacant and undeveloped land. The subject property has primarily been utilized as a residential housing development since at least 1964. The International Affairs buildings were constructed on the southeastern corner of the subject property between 1989 and 1994 before being redeveloped between 2005 and 2009.

There is a gap in site history greater than 5 years between 1903 and 1930, 1930 and 1942, 1947 and 1953, 1953 and 1964, 1979 and 1985, and 1996 and 2002. This constitutes a data failure and is discussed further in Section 13.

The northern adjoining area currently consists of vegetation, a trolley line, and the I-8 freeway. Residential developments have been observed north of the freeway since at least 1979. The southern adjoining area currently consists of multiple campus housing developments, a parking lot, and the Aztec Recreation Center. The campus housing was constructed in 1964 and 2020, the parking lot by 1964, and the Aztec Recreation Center by 1996. The western adjoining area currently consists of vegetation and residential development that was constructed as early as 1964. The eastern adjoining area currently consists of vegetation and SDSU associated facilities that include a parking lot and parking structure, a recreational field, and an SDSU Postal Service. The parking lot was constructed between 1953 and 1964, the parking structure between 1989 and 1994, the recreational field around 2020, and the mail/shipment warehouse around 2002.

8.1 Historical Aerial Photographs

Dudek reviewed historical aerial photographs obtained from EDR for 1949, 1953, 1964, 1966, 1970, 1979, 1985, 1989, 1994, 1996, 2002, 2005, 2009, 2012, 2016, and 2020 (Appendix G). Dudek also reviewed aerial photographs from Google Earth for 2024 (Google Earth 2024). The photographs provided background information to assess the possibility of past activities that could present environmental concerns. The aerial photographs are described in Table 2.

Table 2. Summary of Aerial Photographs

Date	Subject Property	Adjoining and Surrounding Properties
1949	A portion of a road is observed on the southern boundary of the subject property. A north-south trending unimproved trail is observed in the central region of the subject property. The rest of the subject property is observed as vacant and undeveloped land.	A road, graded land, and an oval-shaped track are observed adjoining to the south of the subject property. Vegetation, multiple various-sized structures, and a parking lot are observed in the eastern adjoining and surrounding area. The northern and western adjoining areas are mainly vacant and undeveloped, with scattered vegetation. An east-–west trending unimproved road is observed in the northern adjoining area. Surface grading, multiple unimproved and improved roads, and a mixed-use of residential as well as structures and parking lots associated with SDSU on the eastern property are observed in the eastern surrounding area.
1953	The subject property appears similar to the 1949 aerial photograph.	The unimproved road previously observed in the northern adjoining area is now observed as an improved road. The rest of the adjoining areas appear similar to the 1949 aerial photograph. Additional

Date	Subject Property	Adjoining and Surrounding Properties
		residential and commercial development is observed in the southern and southeastern surrounding areas. An oval-shaped track is observed in the southern surrounding area. The rest of the surrounding areas appear similar to the 1949 aerial photograph.
1964	Multiple various-sized structures and associated parking areas are depicted across the subject property. Building layout suggests these are the present-day residences, as observed during the site reconnaissance (see Section 7).	Additional parking lots are observed on the eastern and southern adjoining areas. The northern adjoining road has been expanded further north. Additional commercial-sized structures are observed on the southern adjoining area. Residential development is observed on the western adjoining as well as northern and southern surrounding areas.
1966	The subject property appears similar to the 1964 aerial photograph.	The adjoining areas appear similar to the 1964 aerial photograph. Redevelopment is observed on the eastern surrounding area where a parking lot was replaced with a commercial-sized structure. The rest of the surrounding areas appear similar to the 1964 aerial photograph.
1970	The subject property appears similar to the 1966 aerial photograph.	The adjoining areas appear similar to the 1966 aerial photograph. Additional redevelopment is observed on the eastern surrounding area where a vacant area was replaced with a commercial-sized structure. Disturbed surface soils are observed in the northwestern and northern surrounding area. The rest of the surrounding areas appear similar to the 1966 aerial photograph.
1979	The subject property appears similar to the 1970 aerial photograph.	The adjoining areas appear similar to the 1970 aerial photograph. A residential housing development is observed in the northwestern surrounding area. The rest of the surrounding areas appear similar to the 1970 aerial photograph.
1985	The subject property appears similar to the 1979 aerial photograph.	Additional residential development is observed in the northern adjoining area, north of the highway. The rest of the adjoining and surrounding areas appear similar to the 1979 aerial photograph.
1989	The subject property appears similar to the 1985 aerial photograph.	The adjoining areas appear similar to the 1985 aerial photograph. Two circular-shaped objects are observed in the eastern surrounding area where previously there was a parking lot. Additional commercial-sized structures are observed in the southern surrounding area. The rest of the surrounding areas appear similar to the 1985 aerial photograph.
1994	An additional structure is observed in the southeastern region of the subject property, which appears to be the present-day International Students Center. The rest of the subject property appears similar to the 1989 aerial photograph.	An additional commercial-sized structure is observed in the southwestern adjoining area. A parking structure is observed on the southeastern adjoining area. A structure in the eastern surrounding area has two circular objects on its roof. The rest of the adjoining and surrounding areas appear similar to the 1989 aerial photograph.
1996	The subject property appears similar to the 1994 aerial photograph.	Additional commercial-sized structures are observed on the southern adjoining area. The rest of the adjoining areas appear similar to the 1994 aerial photograph. A circular structure is being

		constructed in the southeastern surrounding area. The rest of the surrounding areas appear similar to the 1994 aerial photograph.
2002	The subject property appears similar to the 1996 aerial photograph.	An additional commercial-sized structure is observed on the eastern adjoining area. Additional recreational fields are observed in the southern surrounding area. The rest of the adjoining and surrounding areas appear similar to the 1996 aerial photograph.
2005	The subject property appears similar to the 2002 aerial photograph.	An additional road is observed adjoining to the north that extends into the eastern adjoining area. The two previously unidentified circular objects on the eastern surrounding area have been removed.
2009	Two to three additional small structures are observed in the southeastern region of the subject property, in the locations of the present day Passport Office and Global Education Office. The rest of the subject property appears similar to the 2005 aerial photograph.	Additional recreational pools are observed in the southwestern surrounding area. The rest of the adjoining and surrounding areas appear similar to the 2005 aerial photograph.
2012	The subject property appears similar to the 2009 aerial photograph.	A portion of an eastern adjoining parking lot is undergoing grading. The rest of the adjoining and surrounding areas appear similar to the 2009 aerial photograph.
2016	The subject property appears similar to the 2012 aerial photograph.	Additional grading is observed on a previously observed eastern adjoining parking lot. Additional commercial-sized structures are observed in the eastern surrounding area. The rest of the adjoining and surrounding areas appear similar to the 2012 aerial photograph.
2020	The subject property appears similar to the 2016 aerial photograph.	A recreational field is now observed on the eastern adjoining area. A portion of the southern surrounding areas is undergoing grading. The rest of the adjoining and surrounding areas appear similar to the 2016 aerial photograph.
2024	The subject property appears similar to the 2020 aerial photograph.	Additional commercial-sized structures are observed in the southern surrounding area. The rest of the adjoining and surrounding areas appear similar to the 2020 aerial photograph.

Note: See Appendix G for corresponding photographs for 1949 through 2020. The 2024 Google Earth photo is available online and therefore is not included in Appendix G.

8.2 Historical Topographic Maps

Dudek reviewed historical topographic maps from 1903, 1930, 1942, 1947, 1953, 1967, 1975, 1994, 2012, 2015, 2018, and 2021 (Appendix B). The topographic maps are a historical source that can be used to document the prior use of the subject property and surrounding area. The topographic maps are described in Table 3.

DRAFT

Table 3. Summary of Topographic Maps

Date	Subject Property	Adjoining and Surrounding Properties
1903	The subject property is depicted as vacant and undeveloped land.	An east–west trending road is depicted in the northern adjoining area. The rest of the adjoining areas are depicted as vacant and undeveloped land. Networks of improved and unimproved roads are depicted in all of the surrounding areas. Alvarado Canyon is depicted in the northern surrounding area, parallel to a perennial stream or intermittent river. Multiple intermittent streams are depicted in the southern surrounding area. Multiple small structures are depicted in the northwestern and southern surrounding areas. Multiple perennial lakes/ponds or springs/seeps are depicted in the southern surrounding area.
1930	The subject property is depicted similarly to the 1903 topographic map.	The adjoining areas are depicted similarly to the 1903 topographic map. There are additional roads depicted in the southern surrounding areas. Increased residential development is depicted in the southern surrounding areas. The rest of the surrounding areas are depicted similarly to the 1903 topographic map.
1942	A portion of an unimproved road is depicted on the southern boundary of the subject property. The southern portion of the subject property is identified as part of State College. The rest of the subject property is depicted similarly to the 1930 topographic map.	The southern and eastern adjoining areas are identified as State College. Additional unimproved and improved roads are depicted in the southern and eastern adjoining areas and all of the surrounding areas. Multiple structures of various sizes are depicted in the eastern and southeastern surrounding areas and are identified as part of State College. Multiple schools are depicted in the southern surrounding area. Increased residential development is depicted in the southern surrounding areas.
1947	The subject property is depicted similarly to the 1942 topographic map.	The adjoining and surrounding areas are depicted similarly to the 1942 topographic map.
1953	The subject property is depicted similarly to the 1947 topographic map.	The northern adjoining road is now identified as a primary highway. The previously identified State College is now identified as San Diego State College. Portions of the southern and southeastern and southwestern adjoining areas are depicted as shrubland. The rest of the adjoining areas are depicted similarly to the 1947 topographic map. Portions of the southern surrounding area are depicted as built-up areas with multiple schools and houses of worship depicted. Additional roads are depicted in the southern surrounding area. Additional areas of shrubland are depicted in the western surrounding areas.
1967	Multiple structures of various sizes are depicted on the subject property, which appear to represent the present-day residential buildings. A north-south trending road is depicted in the central region of the subject property.	Multiple roads are depicted adjoining to the east, west, and south of the subject property. The primary highway, I-8, is depicted adjoining to the north. Multiple structures of various sizes are depicted adjoining to the south of the subject property. Additional commercial-sized structures are depicted on the eastern surrounding area, associated with the college. Multiple various-sized structures are depicted in the eastern, western, and northeastern surrounding areas. Additional schools are depicted in the northwestern and southeastern surrounding areas. Additional built-up areas are depicted in all of the surrounding

		areas. Additional residential development is depicted in the northeastern surrounding area.
1975	The subject property is depicted similarly to the 1967 topographic map.	All of the adjoining areas are depicted similarly to the 1967 topographic map. An additional structure is observed on the eastern surrounding area. Additional built-up areas are depicted in the northern and northeastern surrounding areas. The rest of the surrounding areas are depicted similarly to the 1967 topographic map.
1994	The subject property is depicted as a built-up area. No individual structures are depicted on the subject property.	Most structures, if not associated with a school or house of worship, are no longer depicted on the map. Additional built-up areas are depicted in all of the surrounding areas.
2012	The subject property is depicted similarly to the 1994 topographic map.	Individual structures, if not associated with a hospital or fire station, are no longer depicted on the map. An east-west trending road previously depicted adjoining to the south of the subject property is no longer depicted. The rest of the adjoining and surrounding areas are depicted similarly to the 1994 topographic map.
2015	The subject property is depicted similarly to the 2012 topographic map.	Some roads previously depicted in the surrounding areas are no longer depicted. School structures are depicted again on the map. The rest of the adjoining and surrounding areas are depicted similarly to the 2012 topographic map.
2018	The subject property is depicted similarly to the 2015 topographic map.	The Del Cerro Reservoir is depicted in the northeastern surrounding area. The rest of the adjoining and surrounding areas are depicted similarly to the 2015 topographic map.
2021	The subject property is depicted similarly to the 2018 topographic map.	The adjoining and surrounding areas are depicted similarly to the 2018 topographic map.

Note: See Appendix B for corresponding maps.

8.3 Fire Insurance Maps

Historical Sanborn fire insurance maps were requested from EDR. Sanborn maps provide information regarding the historical uses of the subject property and surrounding properties. Sanborn maps typically exist for cities with populations of 2,000 or more; the coverage is dependent on the location of the subject site within the city limits. The Sanborn Map Report lists the subject property as an unmapped property; no additional information was included in the report. The Sanborn Map Report is provided in Appendix H.

8.4 City Directory

City directory listings were requested from EDR (Appendix I). No individual address was used to identify the subject property. The city directory search was conducted for the subject property street 55th Street, and the cross streets Canyon Crest Drive, Remington Road, Canyon Crest Road, Hewlett Drive, and Adobe Falls Road.

Table 4 details the findings of the city directory abstract. Findings for the subject property and for adjoining property addresses are summarized in Table 4.

9 Previous Environmental Site Assessments

A Phase I ESA was completed in July 2009 for the Albert's College Apartments by Professional Service Industries, Inc. The subject property was identified as 5430–5485 55th Street, San Diego, California. The subject property consisted of six apartment buildings, landscaped areas, and associated asphalt paved parking areas at the time of the report. Surrounding properties consisted of an interstate to the north, apartment complexes to the south, vacant land and SDSU to the east, and vacant land and residential development to the west. No RECs were identified as part of the Phase I ESA. Due to the age of construction of the subject property buildings, asbestos-containing materials and/or lead paint may be of concern. Recommendations based on the Phase I ESA included verification testing of asbestos containing materials.

DRAFT

10 Vapor Encroachment

Dudek evaluated vapor encroachment to determine whether there is a potential for vapors originating from contaminated soil and/or groundwater to occur in the subsurface below the existing and potential future on-site structures. Information obtained from other sources (geologic and hydrogeological information, site reconnaissance, local regulatory agency responses), as discussed in this report, was also considered. The VEC assessment was conducted in accordance with ASTM E2600-15 guidance (ASTM 2015). The EDR Radius Map Report (Appendix C) was used to evaluate listed contaminated sites as identified in federal, state, and local databases. A VEC assessment report is provided in Appendix J.

No sites were identified as having groundwater contamination or soil vapor contamination that could impact the subject property; as such, no VEC was identified.

DRAFT

11 Non-ASTM Considerations

This section discusses non-ASTM scope considerations that were included in this Phase I ESA based on the conditions at the subject property. These items are not required to be evaluated per the ASTM Standard but may still pose environmental health and safety risks.

Asbestos

Asbestos has been specifically designated a hazardous substance pursuant to CERCLA Section 102, but abatement costs are generally not recoverable under CERCLA. Many building materials commonly contained asbestos until the late 1970s, and a smaller list of building materials contained asbestos in the 1980s, such as drywall, joint compounds, vinyl flooring, roofing, asbestos-cement products, and stucco. Under the Toxic Substances Control Act, the U.S. Environmental Protection Agency banned the use of asbestos in many products, with partial bans occurring in 1989 and 1993. However, a full ban of asbestos products did not occur until 2019. Therefore, if a building was constructed prior to 1989, it is likely it contains asbestos. If it was constructed between 1989 and 2019, it is less likely asbestos is present, but there is still a chance that asbestos was used.

Structures were identified on the subject property historically and as part of the site reconnaissance. The structures were constructed prior to 1989; therefore, asbestos may be of concern for the subject property. Documented asbestos removal was noted for the following addresses associated with the subject property: 5445, 5450, 5460, 5485, and 5640 55th Street. An Asbestos Sampling Report was done in August 2024 for the Tarastec Apartments building on the subject property that identified asbestos-containing materials as a concern for future demolition or renovations.

Lead-Based Paint

Paint manufacturers frequently used lead as a primary paint ingredient through the 1940s and gradually decreased its use in the 1950s and 1960s. The federal department of Housing and Urban Development estimates 30% of homes built in the United States before 1978 contain some lead-based paint. The Consumer Product Safety Commission prohibited the use of lead-based paints in residential buildings in 1978; however, the use of lead-based paints in commercial and industrial buildings is not prohibited.

Structures were identified on the subject property historically and as part of the site reconnaissance. The structures were constructed prior to 1979; therefore, lead-based paint may be of concern for the subject property. A Lead-Based Paint Testing Report was done in August 2024 for the Tarastec Apartments building on the subject property that identified lead-based paint as a concern if removed or becomes deteriorated.

Radon

Radon is a radioactive gas that is produced from the natural decay of uranium, radium, and thorium in soil, rock, and groundwater. When radon becomes trapped in buildings and concentrations accumulate, exposure to radon can be a concern.

The EDR report presents radon test results for the vicinity of the subject property. In this case, those results included a total of 2 sites within San Diego County. The radon concentration at these sites averaged -0.250

DRAFT

picocuries per liter on the first floor living area. The U.S. Environmental Protection Agency radon zone for the County is 3, which corresponds with average expected indoor radon levels of less than 2 picocuries per liter. The federal radon action level is 4 picocuries per liter. Therefore, based on documentation in the EDR report and the EPA's radon zone rating for the County, radon levels at the subject property are estimated at well below the federal action level.

DRAFT

12 Findings and Conclusions

Information gathered for this report indicated the following:

- The subject property was undeveloped and vacant land prior to development as college housing.
- The subject property consists of multiple one-story and two-story residential housing developments, which were constructed between 1953 and 1964.
- The southeastern portion of the subject property includes multiple small structures utilized as SDSU's International Student Center, Global Education Office, and Passport Office. These buildings were constructed between approximately 1994 and 2009. These structures were not accessible during the Site Reconnaissance, which constitutes a data gap. Based on the current and prospective land use, this data gap is not considered significant. Data gaps are discussed in Section 13.
- Multiple environmental regulatory database listings relating to the subject and adjoining properties were identified. These listings were generally administrative in nature, and documented waste removal, chemical storage, and permitted activities. As such, the listings do not indicate a likely impact to the environmental conditions of the subject property.
- The subject property is adjoined by vegetation to the north, east, and west. Beyond the adjoining land, residences are present to the west, I-8 to the north, and the SDSU Postal Service to the east. The southern adjoining properties consist of the SDSU campus and associated facilities.

Dudek performed this Phase I ESA of the subject property in conformance with the scope and limitations of ASTM E1527-21. This report summarizes the research and findings of the Phase I ESA. This assessment did not reveal evidence of RECs, historical RECs, controlled RECs, or VECs in connection with the subject property. Data gaps, which were determined not to be significant, are discussed in Section 13.

Thus, the assessment did not uncover the presence or likely presence of any hazardous substances or petroleum products in, on, or at the subject property due to a release, likely release, past release, or material threat of a future release to the environment.

Based on the analysis, the following environmental condition of potential concern was identified for the subject property:

- Due to the age of construction of the subject property structures, lead-based paint and asbestos may be of concern for the subject property for future demolition or renovations.

13 Limitations

13.1 Data Gaps and Data Failures

As defined in ASTM E1527-21, a data failure is a failure to achieve the historical research objective required by the ASTM Standard even after reviewing the standard historical resources which are reasonably ascertainable and likely to be useful. A data failure is a type of data gap.

The following data failures were identified for this Phase I ESA:

- Historical resources were not available between 1903 and 1930, 1930 and 1942, 1947 and 1953, 1953 and 1964, 1979 and 1985, and 1996 and 2002, which is greater than the 5-year interval required by the ASTM Standard. This constitutes a data failure.

As defined in ASTM E1527-21, a data gap is the lack of or inability to obtain information required by this practice despite good faith efforts. A data gap is considered significant when it affects the ability of the environmental professional to identify RECs.

The following data gaps were identified for this Phase I ESA:

- The data failures discussed above. This data gap does not limit the ability to determine RECs and is therefore not considered significant.
- Dudek did not receive a response from the City of San Diego's Fire-Rescue Department. Based on the site history, available historical and regulatory information, and present-day use, this did not limit the ability to identify RECs and is therefore not considered significant.
- In accordance with ASTM E1527-21 the user must complete a lien search to qualify for landowner liability protections under CERCLA. A lien search was not completed as part of this Phase I ESA. Dudek understands the user already owns the subject property, and this Phase I ESA was not prepared for property acquisition. Therefore, liability protections are not required, and the data gap is not considered significant.

Should Dudek receive information following submission of this Phase I ESA report that completes one of these data gaps and changes the findings of the Phase I ESA report, Dudek will submit the findings to the user in an addendum.

13.2 Report Limitations

The findings and conclusions presented in this report are professional opinions based solely on the indicated data described in this report, as reflected in the discussion in this report of the visual observations of the subject property and vicinity and documentation reviewed, and based on the foregoing, our interpretation of this information and these documents. Dudek makes no warranty, guarantee, or representation, express or implied, as to statements made by others or information included in documentation reviewed or otherwise provided to Dudek, as described in this report.

No warranties or guarantees or representations, expressed or implied, are made by Dudek, except for the representation that this report has been prepared in accordance with the current generally accepted practices

and standards consistent with the level of care and skill exercised under similar circumstances by other professionals performing the same or similar services in the same or similar geographical locality. This report, including its conclusions and/or recommendations, is intended exclusively and solely for the purpose outlined herein and for the client identified hereunder. This report may not be relied upon by any other person or entity without the express advance written consent of Dudek specifically identifying such person or entity. Dudek reserves the right to further condition any such third-party use based on matters it deems appropriate under the circumstances, in its sole discretion.

This report is subject to the conditions and restrictions and limitations described in ASTM E1527-21.

In accordance with Section 4.6.1 of ASTM E1527-21, this Phase I ESA is valid as a general matter for not longer than 180 days from the date of the first interview, first review of government records, or first visual inspection. If this Phase I ESA has been prepared for the purposes of a transaction, the report must have been completed no more than 180 days prior to the transaction date to be considered viable. Otherwise, the report must be updated or revised in accordance with ASTM E1527-21.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/22/2024 has revealed that there are 2 CA ENVIROSTOR sites within approximately 1 mile of the target property.

CA SAN DIEGO CO. SAM: The listing contains all underground tank release cases and projects pertaining to properties contaminated with hazardous substances that are actively under review by the Site Assessment and Mitigation Program.

A review of the CA SAN DIEGO CO. SAM list, as provided by EDR, and dated 03/23/2010 has revealed that there are 4 CA SAN DIEGO CO. SAM sites within approximately 0.5 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/09/2024 has revealed that there are 2 FINDS sites within approximately 0.001 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 3 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CA HWTS: DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

A review of the CA HWTS list, as provided by EDR, and dated 01/26/2024 has revealed that there are 8 CA HWTS sites within approximately 0.001 miles of the target property.

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2023 has revealed that there are 8 CA HAZNET sites within approximately 0.001 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Emissions & Generation Resource Integrated Database (EGRID) contains data on emissions and resources mix for virtually every power plant and company that generates electricity in the United States.
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
THE ENERGY INFORMATION ADMINISTRATION (EIA) IS AN INDEPENDENT AGENCY WITHIN THE U.S. DEPARTMENT OF ENERGY THAT DEVELOPS SURVEYS, COLLECTS ENERGY DATA, AND DOES ANALYTICAL AND MODELING ANALYSES OF ENERGY ISSUES. THE EIA-860 DATABASE SUPPORTS THE ANNUAL ELECTRIC GENERATOR REPORT AND CONTAINS ELECTRIC UTILITY AND NON-UTILITY (INCLUDING INDEPENDENT POWER PRODUCERS, COMBINED HEAT AND POWER PRODUCERS, AND

SAN DIEGO STATE UNIVERSITY (Continued) **1000110649**

OTHER INDUSTRIALS) GENERATOR-SPECIFIC PLANT DATA, INCLUDING COUNTY AND STATE LOCATION AND OWNERSHIP INFORMATION
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). Uranium ore was mined by private companies for federal government use in national defense programs. US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

USGS TOPOGRAPHIC MAP

Target Property Map:	50003512 LA MESA, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

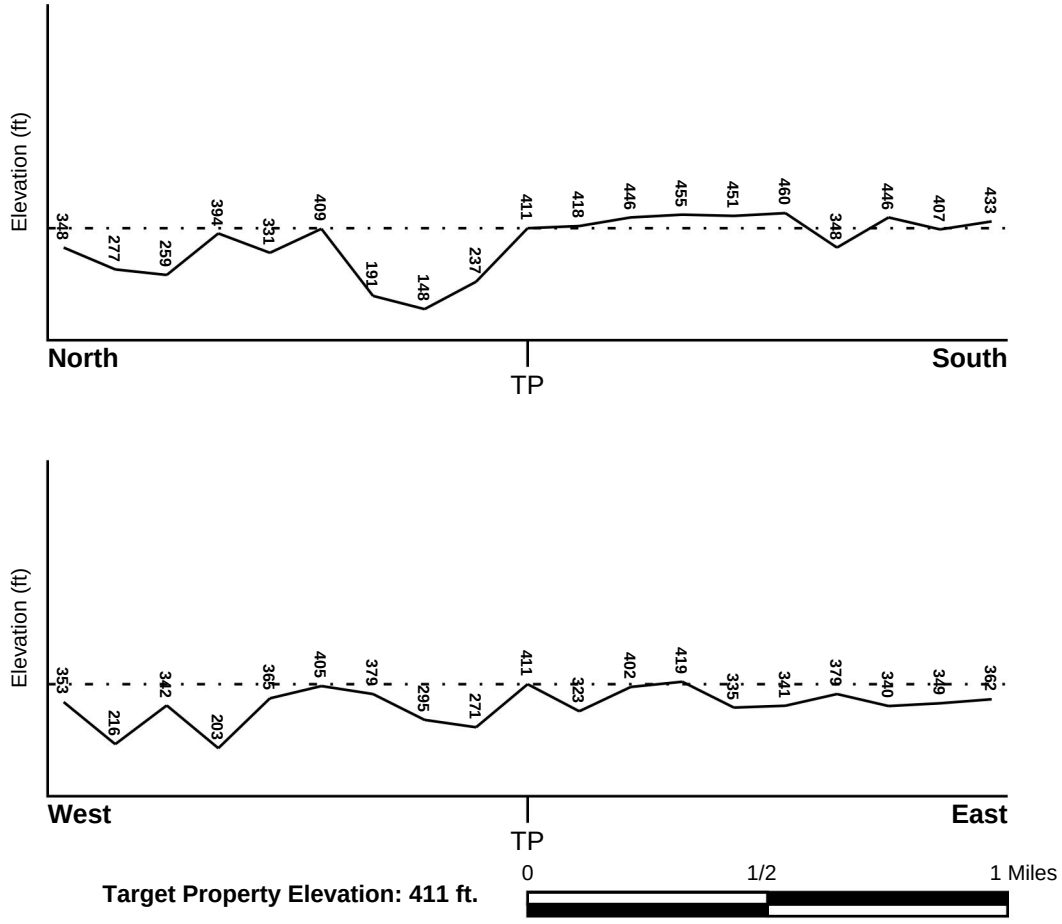

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: OLIVENHAIN

Soil Surface Texture: cobbly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

Owner-Provided Information

DRAFT

The ASTM Standard (E 1527-21, Section 10) for Phase I Environmental Site Assessments requires interviews with past and present owners and occupants of the property in order to obtain information on the history and uses of the property. Please answer the questions below to the best of your knowledge. Please provide additional information for all YES answers.

1. **Current Property Uses and Buildings:**
   How long have you owned or occupied the property?

~15 years

Describe the current uses of the property.

Student housing (apartments), parking

How long has the property been used for these purposes?

Since the 1950s-1960s (according to information from prior owner)

Describe any buildings on the property and indicate the years they were constructed.

2- and 3- story apartment buildings constructed c. 1950s - 1960s (according to information from prior owner)

2. **Past Uses:** Describe the past use(s) of the property and indicate the time period for each use, if known.

Housing and parking, since the 1950s. Information from the prior owner indicated the site was previously undeveloped.

3. **Previous Owners/Operators:** Please identify previous owners and operators and provide their contact information (if available).

55th Street Venture, LLC
MS Browar Development Corporation
Okavita Family Trust
Danube Properties, Inc

4. **Industrial Uses:** Please indicate whether the property or adjoining properties have been used for the following industrial uses. **Adjoining properties** include properties that are across the street from yours.

City of San Diego Public Records

A message was sent to you regarding record request #24-5950:

Greetings:
In response to your request, permitting information from 2003 - present is publicly available online and the links to search are being provided for your reference.
If building plans exist, these records cannot be provided in the public records request portal pursuant to Government Code section 7927.705 which states documents are exempt from disclosure if they are "exempted or prohibited pursuant to federal or state law." Federal law provides that architectural plans can be inspected, but not copied without permission of the owner; state law provides that building plans can be inspected, but not copied without written permission of the professional who signed the document and the original or current property owner. (17 U.S.C. § 101; California Health and Safety Code § 19851).
Accordingly, building plans can be made available for review at the Development Services Department through an in-person appointment
here: https://www.sandiego.gov/development-services/virtual-

appointments. The person making this determination is Kendall Jordan, Administrative Aide I.
Other plan requests (such as Site and/or Construction for instance) are fulfilled directly by the Development Services Department following a different process: please email DSDRCD@sandiego.gov.
The City is still in the process of reviewing other potentially responsive records. We will continue providing any disclosable records on a rolling basis as they become available. We expect to provide an update by September 20th. We reserve the right to withhold and/or redact any records or information that may be exempt from disclosure under the Public Records Act, and/or other applicable legal privileges including, but not limited to, attorney work product and attorney client privileges.
Best regards.

County of San Diego Public Records

Record request #24-2148 has been closed. The closure reason supplied was:

Hello,
This is in response to your California Public Records Act request, which the County of San Diego received on 08/28/2024 and which states:
I'd like to request all records and permit information pertaining to hazardous materials and chemicals usage and storage, storage tanks (underground or aboveground), and any releases or investigations associated with properties located at 5429, 5430, 5445, 5450, 5452, 5460, 5470, 5471, 5475, 5484, 5485, 5486, and 5499 55th Street, as well as the adjoining properties located at 1261 and 5500 Canyon Crest Drive in San Diego, CA 92115. The site currently consists of multiple San Diego State University's housing and student services buildings and associated parking areas. If there is any additional information I can provide to help facilitate this request, please let me know. Thanks

The County does not have any records responsive to your request. Please note that 72 hours after you receive this message your request will become publicly available.
Thank you,
DEHQ- Hazardous Materials Division

SUBJECT: 60-DAY BORING REPORT, PRELIMINARY GEOTECHNICAL INVESTIGATION, 55TH STREET VILLAGE, NORTH TERMINUS OF 55TH STREET, SAN DIEGO, CALIFORNIA

To Whom It May Concern:

This letter is to confirm the excavation and backfill of four 30-inch diameter bucket auger borings at the subject site. The borings were drilled to varying depths up to 52 feet below the existing site grades. Upon completion the excavations were entirely backfilled with alternating lifts of bentonite grout and clean native soil material as offered by the Site Assessment and Mitigation Program as an acceptable alternative for backfilling large diameter geotechnical borings. The borings were sealed in accordance with the California Well Standards Bulletins and the County of San Diego Code of Regulatory Ordinances. Attached is a site plan with the boring locations, boring logs and large diameter boring backfilling procedure. Groundwater was not encountered in any of the borings.

Respectfully submitted,
CHRISTIAN WHEELER ENGINEERING

GEOTECHNICAL BORING CONSTRUCTION PERMIT

SITE NAME: PROPOSED SDSU HOUSING DEVELOPMENT

SITE ADDRESS: 5430, 5460, 5471 55TH ST., SAN DIEGO, CA 92115

PERMIT FOR: 3 GEOTECHNICAL BORINGS

PERMIT APPROVAL DATE: 08/30/2006

PERMIT EXPIRES ON: 12/28/2006

RESPONSIBLE PARTY: ROBERT ZEPS / ALBERTS COLLEGE APARTMENTS LLC

PERMIT CONDITIONS:

1. All borings must be sealed from the bottom of the boring to the ground surface with an approved sealing material as specified in California Well Standards Bulletin 74-90, Part III, Section 19.D. **Drill cuttings are not an acceptable fill material.**

2. All borings must be properly destroyed within 24 hours of drilling.

3. Placement of any sealing material at a depth greater than 30 feet must be done using the tremie method.

4. This work is not connected to any known unauthorized release of hazardous substances. Any contamination found in the course of drilling and sampling must be reported to DEH. All water and soil resulting from the activities covered by this permit must be managed, stored and disposed of as specified in the SAM Manual in Section 5, II, E- 4. (**http://www.sdcounty.ca.gov/deh/lwq/sam/manual_guidelines.html**). In addition, drill cuttings must be properly handled and disposed in compliance with the Stormwater Best Management Practices of the local jurisdiction.

5. Within 60 days of completing work, submit a well/boring construction report, including all well and/or boring logs and laboratory data to the Well Permit Desk. This report must include all items required by the SAM Manual, Section 5, Pages 6 & 7.

6. **This office must be given 48-hour notice of any drilling activity on this site and advanced notification of drilling cancellation. Please contact the Well Permit Desk at 619) 338-2339.**

H. **QUESTIONNAIRE: Please answer all applicable questions completely. For well destructions, complete only #1 below and submit any required supportive documentation.**

1. If wells are to be destroyed, provide a description of method of destruction N/A

2. What is the purpose of the well/boring investigation?

   ☐ a. Part of an ongoing site assessment case in which DEH or another government regulator is the lead agency.

   ☐ b. Part of a Phase I investigation for property ownership transfer or: _____

   ☑ c. Geotechnical investigation for proposed construction, land stabilization or:

   ☐ d. Other: _____

3. What procedures will be used to prevent the well/boring from providing an avenue to contamination during construction? BORINGS WILL BE BACKFILLED W/ BENTONITE GROUT & CAPPED W/ CONCRETE

4. What field procedures will be utilized to determine if contamination exists? _____
   VISUAL OBSERVATION, NO CONTAMINATION ANTICIPATED

5. What procedures will be used to determine whether samples will be sent for laboratory testing or archiving?
   ONLY GEOTECHNICAL SAMPLING WILL BE PERFORMED

6. What constituents will be monitored and tested (Include EPA Laboratory Test Methods to be used)? _____
   N/A

7. How will samples be transported and preserved? N/A

8. What sampling methods will be used? N/A

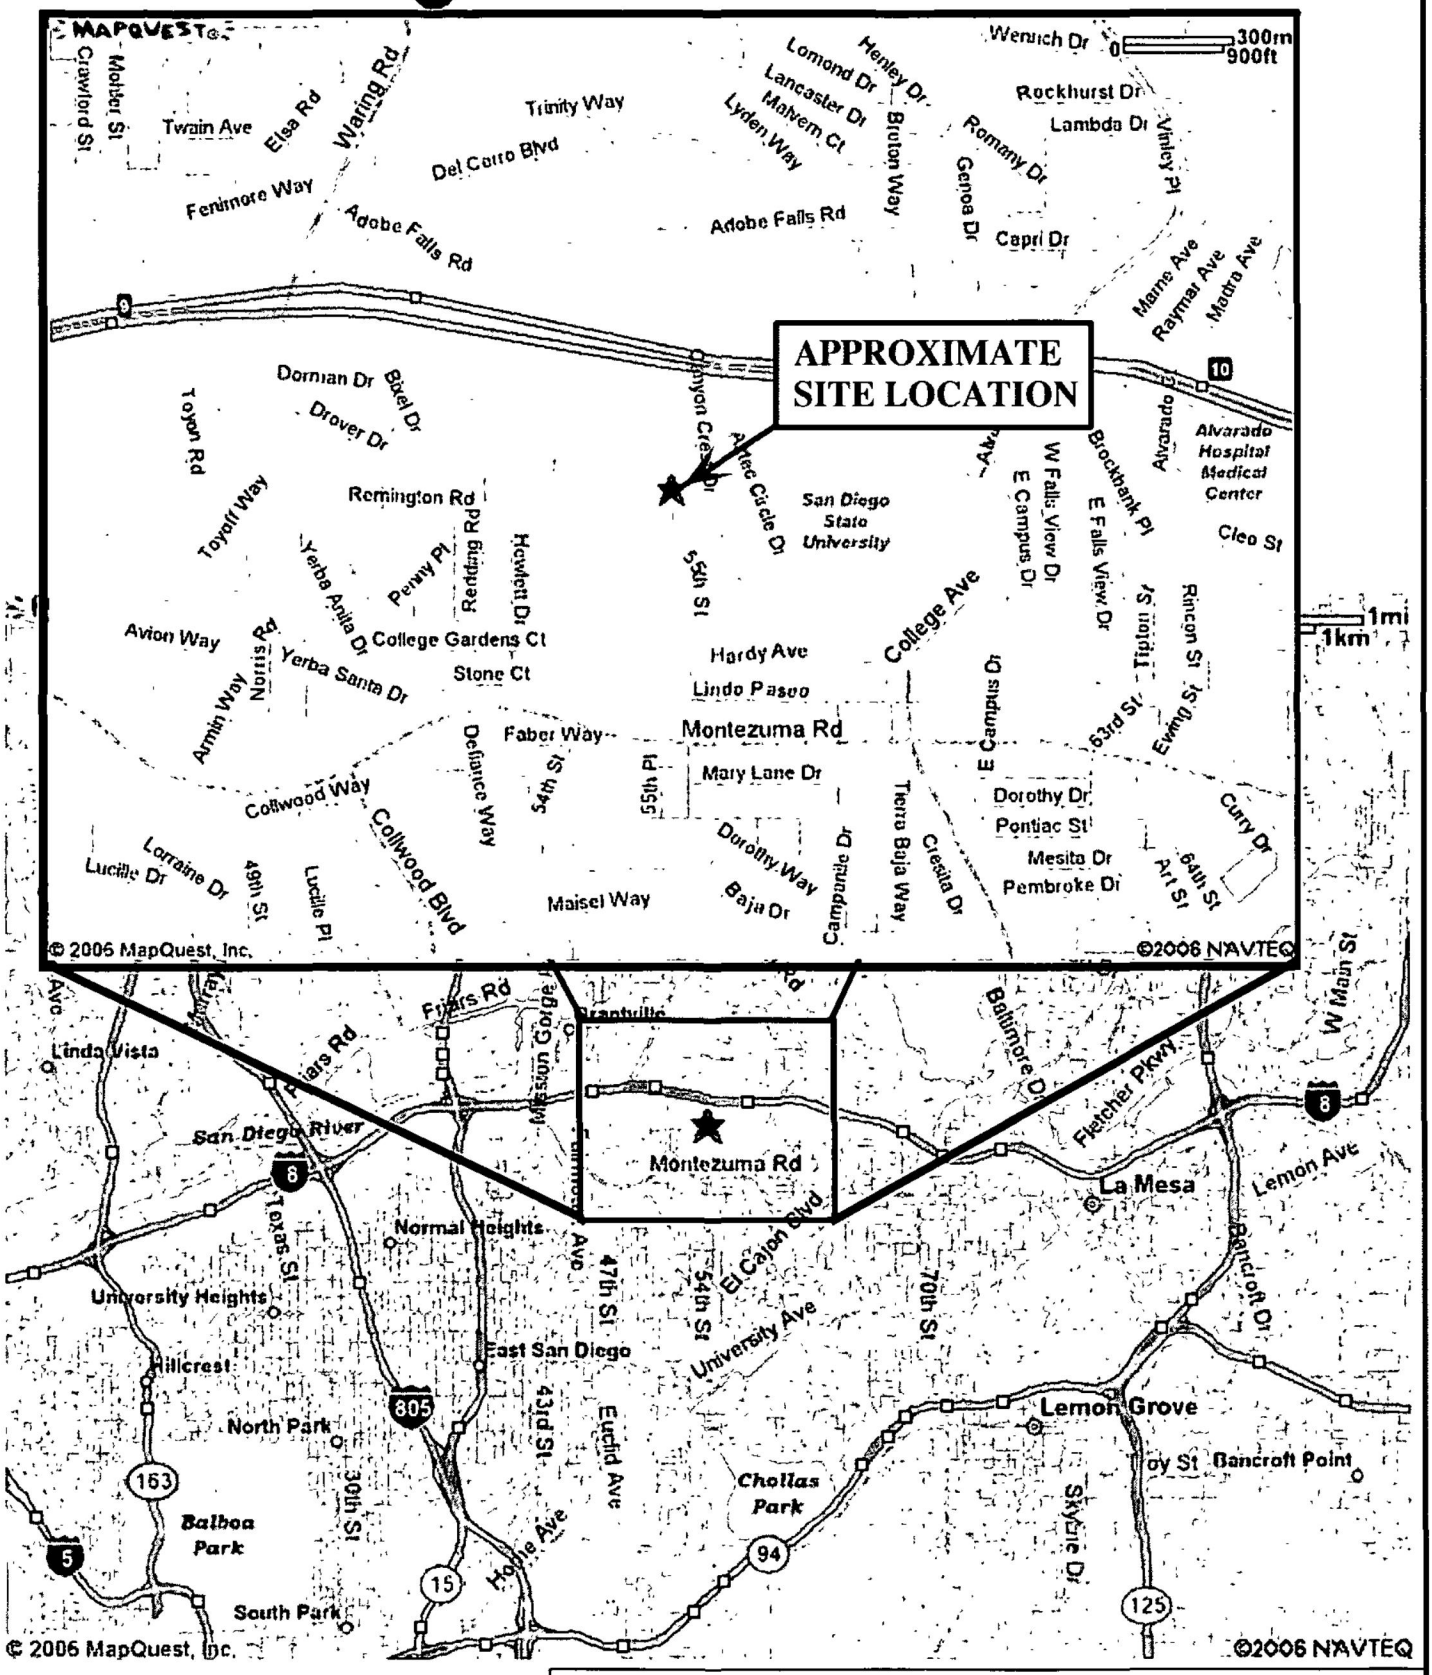

9. Are you proposing a variation from the methods and/or procedures presented in the requirements for the construction or destruction of Vadose and Groundwater Monitoring Wells (Current SAM Manual Requirements)? If yes, specify these variations and include a well construction diagram and all required supporting documentation. Refer to the SAM Manual Appendix B for monitoring well guidelines (http://www/sdcounty.ca.gov/deh/lwq/sam/monitoring_well.html). : NO

10. Are you proposing a variation in drilling and destruction of soil borings from the methods and/or procedures specified in the current SAM manual? If yes, specify these variations and include a destruction diagram.
    NO

11. What procedures will be used to ensure that the drilling equipment will introduce no contamination? CLEAN AUGERS TO BE USED

12. What methods will be used to clean sampling equipment? N/A

13. What cleaning method will be used to clean casing and screen prior to installation? N/A

PROPERTY OWNER RESPONSIBILITY ACKNOWLEDGEMENT

Proposed locations for subsurface work:

Property Address:

Assessor's Parcel Number (APN):

462220030O, 4622200100,
4621801000, 4621800800

I, Robert Zeps (CTE), owner of the property/properties listed above, give my permission to Construction Testing & Engineering, Inc. (consulting company, contractor) to conduct the following work at the locations stated above.

☐ Install _____ monitoring wells ☐ Destroy _____ monitoring wells ☑ Drill 3 soil borings

The person who causes to have a monitoring well installed or an existing well destroyed on this property is defined as the *Responsible Party*. San Diego County Code, Section 67.424, states that: "Monitoring wells shall be maintained to meet construction or destruction standards. If a monitoring well does not meet construction or destruction standards, the *Responsible Party* must repair, reconstruct or destroy the monitoring well so it meets the standards. The property owner, if different than the *Responsible Party*, must take the necessary actions to repair, reconstruct or destroy the monitoring well so it meets the standards if the *Responsible Party* does not complete the necessary actions."

A soil boring is used specifically to sample soil and, because there are construction and destruction standards, is included in the definition of a monitoring well even though no maintenance is required. These standards are outlined in the County of San Diego Site Assessment and Mitigation (SAM) Manual and the State of California Well Standards Bulletin 74-90.

I understand that Martin E. Stein (registered professional) of CTE (consulting company) and an authorized signer for West Associates (drilling company) have submitted a signed application to the Department of Environmental Health in which they have agreed to complete the above-stated work according the requirements of the current SAM Manual, all ordinances and laws of the County of San Diego and the State of California pertaining to well/boring construction and destruction.

I also understand that if either the registered professional and/or the licensed drilling company should fail in their responsibilities as defined in San Diego County Code, Section 67.424, I, as the property owner, must take the necessary actions to repair, reconstruct or destroy the monitoring well so it meets the standards if the Responsible Party does not complete the necessary actions.

The scope of work covered by this Acknowledgement will expire one year from the date of the property owner's signature below. If an extension of time beyond one year is required to complete the proposed drilling activities or additional work is proposed, a new Property Owner Responsibility Agreement will be required.

Boring Permit #LMON 104240
Proposed SDSU Housing Develepment
5430, 5460, 5471 55th Street
San San Diego, California 92115

Dear Sir or Madam:

Enclosed is the requested follow-up information (boring logs and an exploration location map for this site) for this permit. Please note that these were *geotechnical borings* only and therefore no laboratory information is presented. As anticipated by the referenced permit, three permit-required borings were emplaced.

The boring excavations were backfilled with bentonite grout. Approximate volumes of grout used are noted on each boring log. Please feel free to contact this office should you have any questions or concerns.

Respectfully submitted,
CONSTRUCTION TESTING & ENGINEERING, INC.

GEOTECHNICAL BORING CONSTRUCTION PERMIT

SITE NAME: ALBERTS COLLEGE APARTMENTS/SDSU SLIVER

SITE ADDRESS: 5475, 5484, 5485 55TH ST, SAN DIEGO, CA 92115

PERMIT FOR: **9 GEOTECHNICAL BORINGS**

PERMIT APPROVAL DATE: FEBRUARY 15, 2008

PERMIT EXPIRES ON: JUNE 14, 2008

RESPONSIBLE PARTY: 55TH STREET VENTURE, LLC

PERMIT CONDITIONS:

1. All borings must be sealed from the bottom of the boring to the ground surface with an approved sealing material as specified in California Well Standards Bulletin 74-90, Part III, Section 19.D. **Drill cuttings are not an acceptable fill material.**

2. All borings must be properly destroyed within 24 hours of drilling.

3. Placement of any sealing material at a depth greater than 30 feet must be done using the tremie method.

4. This work is not connected to any known unauthorized release of hazardous substances. Any contamination found in the course of drilling and sampling must be reported to DEH. All water and soil resulting from the activities covered by this permit must be managed, stored and disposed of as specified in the SAM Manual in Section 5, II, E- 4. (**http://www.sdcounty.ca.gov/deh/lwq/sam/manual_guidelines.html**). In addition, drill cuttings must be properly handled and disposed in compliance with the Stormwater Best Management Practices of the local jurisdiction.

5. Within 60 days of completing work, submit a well/boring construction report, including all well and/or boring logs and laboratory data to the Well Permit Desk. This report must include all items required by the SAM Manual, Section 5, Pages 6 & 7.

6. **This office must be given 48-hour notice of any drilling activity on this site and advanced notification of drilling cancellation. Please contact the Well Permit Desk at 619) 338-2339.**

H. **QUESTIONNAIRE: Please answer all applicable questions completely. For well destructions, complete only #1 below and submit any required supportive documentation.**

1. If wells are to be destroyed, provide a description of method of destruction NA

2. What is the purpose of the well/boring investigation?

   ☐ a. Part of an ongoing site assessment case in which a government regulator is the lead agency. If yes, indicate which government regulator is the lead agency and the case number.

   _____ DEH _____ RWQCB _____ DTSC

   ☐ b. Part of a Phase I investigation for property ownership transfer or: _____

   ☒ c. Geotechnical investigation for proposed construction, land stabilization or:

   ☐ d. Other: _____

3. What procedures will be used to prevent the well/boring from providing an avenue to contamination during construction? THE BORINGS WILL BE PROPERLY BACKFILLED.

4. What field procedures will be utilized to determine if contamination exists? VISUAL AND OLIFACTORY EXAMINATION.

5. What procedures will be used to determine whether samples will be sent for laboratory testing or archiving? NO SAMPLES WILL BE SENT TO A LABORATORY, GEOTECHNICAL TESTING ONLY

6. What constituents will be monitored and tested (Include EPA Laboratory Test Methods to be used)? NA

7. How will samples be transported and preserved? BY TRUCK TO CWE FACILITIES.

8. What sampling methods will be used? SPLIT SPOON/BARREL SAMPLING

9. Are you proposing a variation from the methods and/or procedures presented in the requirements for the construction or destruction of Vadose and Groundwater Monitoring Wells (Current SAM Manual Requirements)? If yes, specify these variations and include a well construction diagram and all required supporting documentation. Refer to the SAM Manual Appendix B for monitoring well guidelines (http://www/sdcounty.ca.gov/deh/lwq/sam/monitoring_well.html). :NO

10. Are you proposing a variation in drilling and destruction of soil borings from the methods and/or procedures specified in the current SAM manual? If yes, specify these variations and include a destruction diagram. NO

11. What procedures will be used to ensure that the drilling equipment will introduce no contamination? ALL EQUIPMENT WILL BE STEAM CLEANED PRIOR TO ARRIVAL.

12. What methods will be used to clean sampling equipment? ON-SITE WASH AND RINSE

13. What cleaning method will be used to clean casing and screen prior to installation? ON-SITE WASH AND RINSE

14. A property owner consent agreement is required for all applications, except for onsite, open LOP/SAM site assessment cases, Caltrans properties and military properties. If a consent agreement is required, how has the property owner been notified of the proposed work? _____

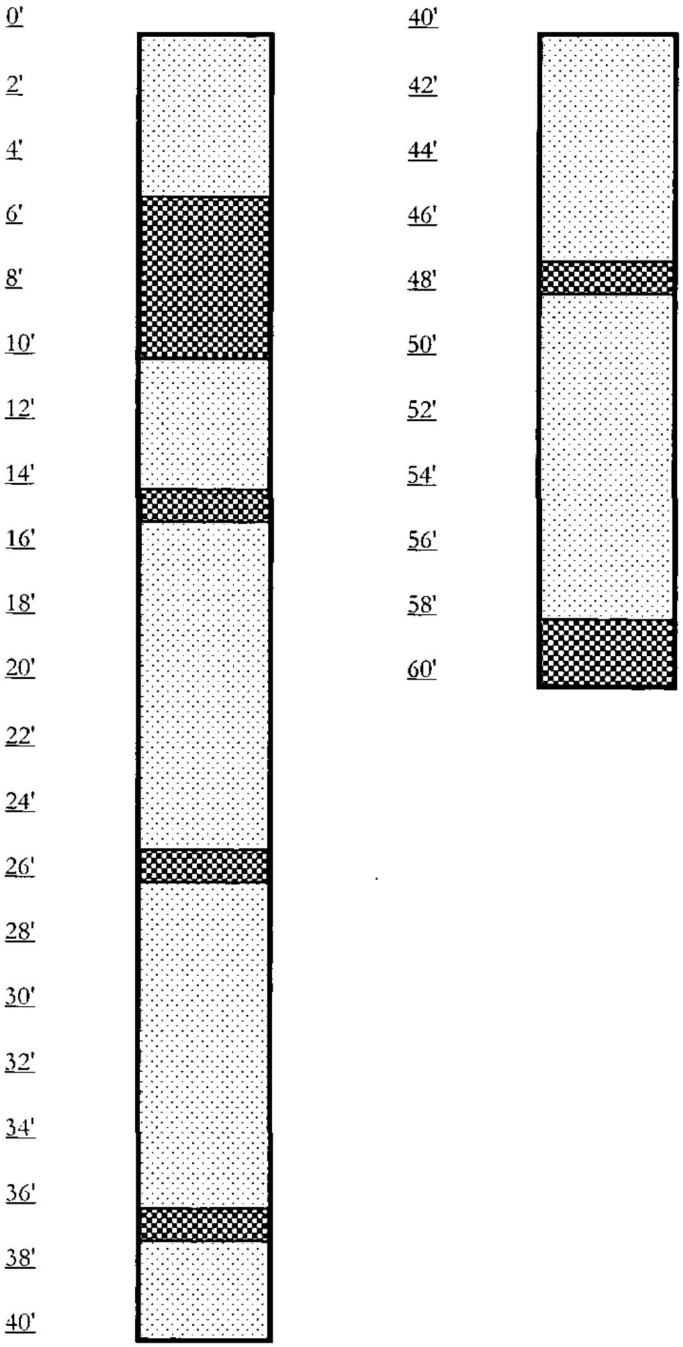

A. ☒ The attached Property Owner Consent letter.

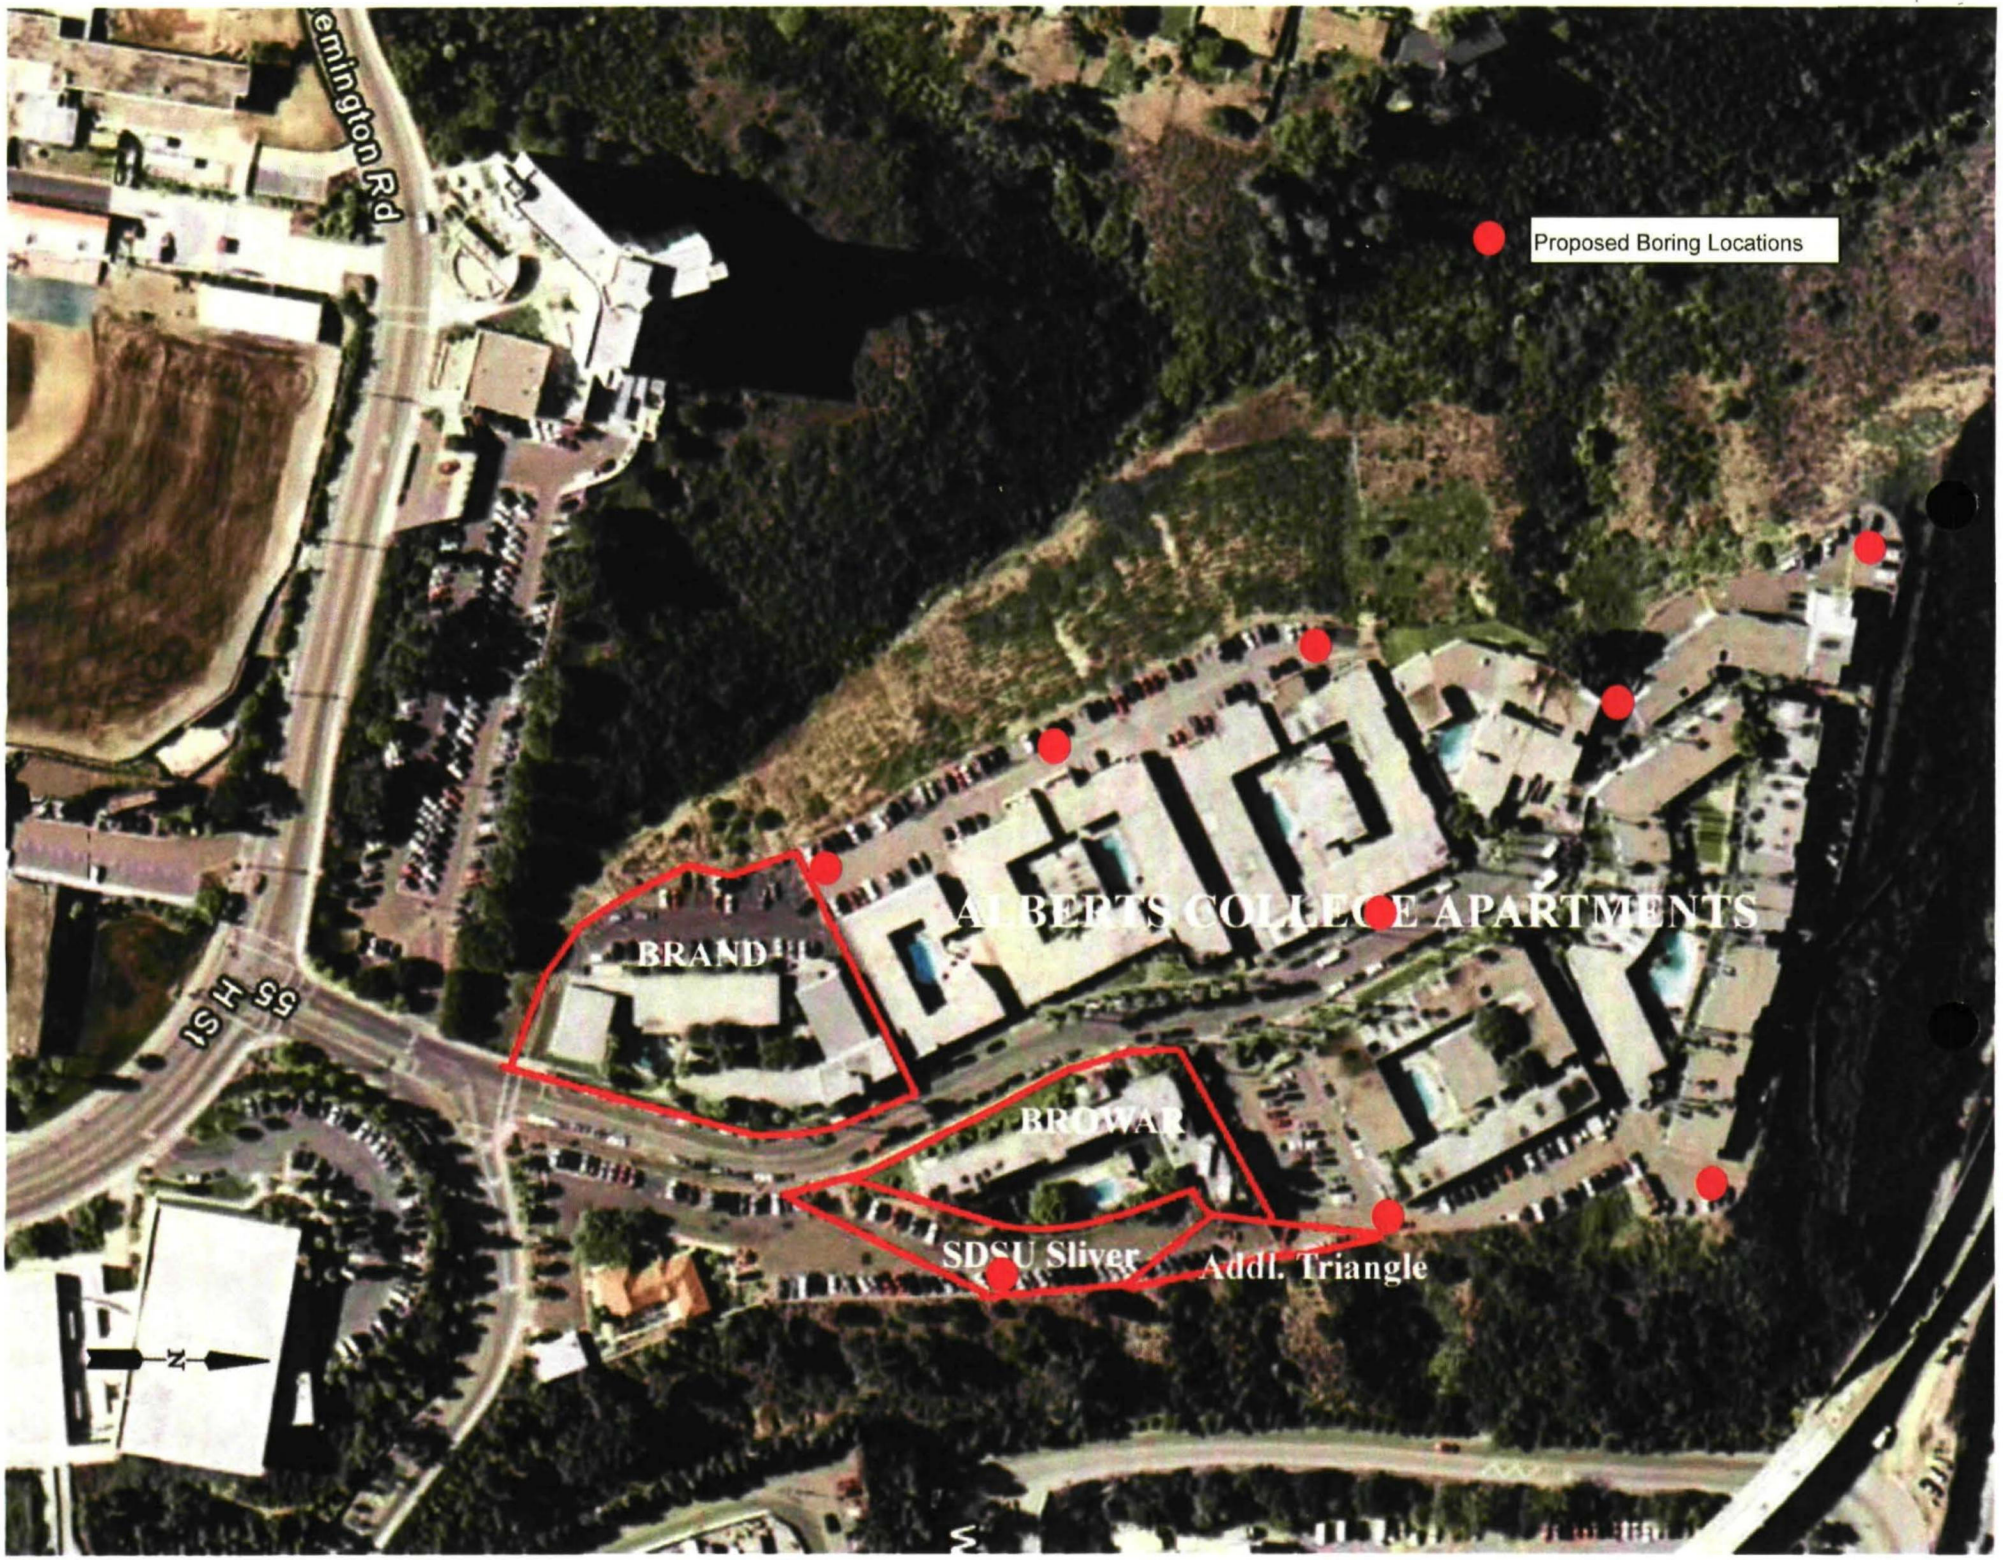

B. ☐ The attached consent agreement between the responsible party and the property owner with a cover letter signed by the registered professional who signed the permit application.

County of San Diego Public Records

Record request #24-2154 has been closed. The closure reason supplied was:

Hello,
This is in response to your California Public Records Act request, which the County of San Diego received on **August 28, 2024,** and which states:
I am conducting a Phase I Environmental Site Assessment for properties located on the San Diego State University campus that includes the properties located at 5429, 5430, 5445, 5450, 5452, 5460, 5470, 5471, 5475, 5484, 5485, 5486, and 5499 55th Street, as well as the adjoining properties located at 1261 and 5500 Canyon Crest Drive in San Diego, CA 92115. The site currently consists of multiple San Diego State University's housing and student services buildings and associated parking areas. I am looking for information focused on agricultural use as well as pesticide, insecticide, and herbicide use in relation to the above-mentioned property. Please let me know if there's any additional information I can help to provide you with to facilitate this request.

The County does not have any records responsive to your request. Please note that 72 hours after you receive this message your request will become publicly available.
Thank you,
Agriculture, Weights and Measures

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
